

Accommodation @ LJMU

LJMU sent like a factfile of the prices and where locations of the accommodations were.

The LJMU website is absolutely brilliant it links you to all their accommodation and everything.

There is so much accommodation in Liverpool, you can choose anything, you can be in a huge dorm, you can be in a house, you can live in so many different accommodations through so many different companies; That you have got the choice here.

The photographs portray the rooms really well, you can see how much space you had. It shows you the bed layout and the desk layout, and came here and had a look, and it is just how the photos say.

I didn't want to be sharing a bathroom with anyone else, I wanted my own bathroom that was a really important feature in my accommodation .

I love the fact that we have our own wash room, we have a single bed, a closet, a desk. I mean what else do you really need.

There is a laundry room, there is a shop and we all have internet and phones in our rooms.

There is like a common room where you can go down stairs and play a game of pool, just hang out with people.

We have vending machines, all around the accommodation and we have onsite bike storage.

A kitchen with fridge freezer and cooker.

We have a gym too.

We have a living room together, where you can bring your own game plug it into the TV.

The city centre has got security; you have got everything you need basically within the accommodation itself. So why move out and pay more bills when it is all paid for through basically direct deposits.
