

## Facilities @ LJMU

Our facilities are absolutely top class, I mean the lab that we are in right now, all of our teaching facilities are excellent.

As a student at Liverpool John Moores there are masses of support and facilities and resources to access when completing projects or work.

They have done a lot of modernisation recently and the libraries are sort of a very nice bright place to go to study. I mean sometimes we go to the library even if we don't have any work to do, we just sort of go along, because they have nice café and things round, just sort of sit and have a coffee and catch up because they are very central.

All of the facilities are there and the ones that are used in the industry as well. So I have found that really good because if I want experience in the industry at some point I have had it at university.

The libraries are well stocked with what we need, there is a lot of texts books, journals, new editions of books coming out, computer labs, printers, scanners, everything is readily available.

There is nothing I can think of that we don't provide for students and if I did think of something, I know how to get it.
