

# Resources for Computer Science

**Contact details for further help are at the end of this guide.**

The resources in this guide will help you learn more about your subject. The best place to start your search is **Discover**, which provides you with easy access to thousands of books, eBooks, journal articles and much more. You can access Discover and other key resources via the **Electronic Library** at: [www.ljmu.ac.uk/library/e-library](http://www.ljmu.ac.uk/library/e-library)

Remember, your modules also have reading lists in Canvas with links to recommended books, eBooks, journal articles and other subject resources.

## Books and eBooks

There is an extensive collection of books and eBooks on all aspects of Computer Science. You can browse what is available in your subject area or look for specific titles by searching **Discover**.

- Go to **Discover**, if prompted, **Sign in** with your **LJMU username@ljmu.ac.uk** and **password**
- Type a book title or keywords and select the search icon
- From the results screen, you can filter your results by selecting **Books**
- Select a book title to see more details and availability
- eBooks will have links to view online
- Print books will show number of copies and location

Print books have a class number and are organised numerically by that number on the shelves. Common class numbers are shown below:

Computer Forensics and Crime	363.25
Computer Graphics and Media	006.6
Computer Modelling and Simulation	003.3
Databases	005.74
Data Security	005.8
Game Design	794.8
Human-Computer Interaction	004.019
IT Law	343.0999
Local Area Networks	004.68

Operating Systems	005.43
Operational Research	658.4034
Software Engineering and Programming	005.1
Systems Analysis and Design	004.2
Types of Computer Systems	003.7

## Journals

Journals are published on a regular basis and contain up-to-date information. Journals contain articles focussing on specific topics written by subject specialists.

To find individual journal titles on your subject area:

- Go to **Discover**, if prompted, **Sign in** with your **LJMU username@ljmu.ac.uk** and **password**
- Select the **Journals** option
- Type a journal title you wish to access and select the search icon
- Select a journal title to see more details and availability
- eJournals will have links to view online
- Print journals will show number of issues and location

A selection of journals on Computer Science are shown below:

ACM Transactions on Information Systems

ACM transactions on Multimedia Computing, Communications and Applications

Computer Networks

Digital Creativity

Expert Systems with Applications

IEEE Software

IEEE Internet of Things Journal

Image and Vision Computing

Information and Computer Security

Information Systems Journal

International Journal of Digital Crime and Forensics

International Journal of High Performance Computing Applications

International Journal of Human-Computer Studies

International Journal of Software Engineering and Knowledge Engineering

Journal of Computer Security  
Journal of Parallel and Distributed Computing  
Journal of Software  
Journal of Systems and Software  
Pattern Analysis and Applications  
Software, Practice and Experience  
Statistics and Computing  
Systems Research and Behavioral Science

## Databases

You can search for journal articles using **Discover** or via individual databases. There are different types of databases. For example:

- **Full-text databases** provide access to full-text information such as journal articles, reports, book chapters, newspaper articles, etc.
- **Abstracting and Indexing Databases** are searchable indexes, you can view the abstract or summary for each resource. If full-text is available follow the link, if not you can request an **Inter-library loan** at: <https://www.ljmu.ac.uk/microsites/library/resources/access-to-other-libraries/inter-library-loan-service>

To access a database:

- Go to **Discover**, if prompted, **Sign in** with your **LJMU username@ljmu.ac.uk** and **password**
- Select the **Databases** option
- Select **Computer Science** to see suggested databases or type the name of the database in the search box and select the **search icon**
- Select the database title to see more details and note any log-in requirements
- Select the database link

## Academic Full-text Databases

### Access Engineering

A reference source of eBooks, videos, interactive spreadsheets and tutorials for all Engineering disciplines including Mechanical, Electrical, Civil and Product Design Engineering, Computer Science and Built Environment

### ACM Digital Library

A research discovery platform from the Association for Computing Machinery (ACM) that provides access to over 2.8 million publications from 1908 – Present including journals, conference proceedings, technical magazines, newsletters and books. A wide variety of

topics are covered, everything from machine learning and network security to software engineering and human-computer interaction. It also includes The ACM Guide to Computing Literature – a comprehensive index of research abstracts focused exclusively on the field of computing.

#### [BoB \(Box of Broadcasts\)](#)

Box of Broadcasts (BoB) gives you access to an archive of over one million TV and radio programmes from 2007 onwards, including all the main free-to-air TV channels. You can link, make short clips and playlists of content.

#### [Emerald Insight](#)

Provides access to peer-reviewed journals, books and case studies. Content covers a wide range of subjects including accounting and finance, business and management, marketing, education, information studies and engineering.

#### [IEEE XPlore](#)

A powerful search tool that provides access to key scientific and technical research published by IEEE (Institute of Electrical and Electronics Engineers) and its partners such as: IEEE journals, IEEE conference proceedings, IEEE standards and the IEEE-Wiley eBooks Library and IET conference proceedings.

#### [IET Open Access Journals](#)

Provides access via the IET (The Institution of Engineering and Technology) Hub to the collection of IET open access journals from 2013 to date.

#### [O'Reilly Online Learning](#)

Expert-created and curated information covering all the areas that will shape our future—including artificial intelligence, operations, data, UX design, finance, leadership, and more.

#### [ProQuest Central](#)

ProQuest Central provides access to databases across all major subject areas and includes thousands of full-text scholarly journals, trade and professional titles, newspapers, magazines, dissertations, working papers, case studies, and market reports.

#### [ScienceDirect](#)

The world's leading source for scientific, technical, and medical research. It is a multidisciplinary database, which provides full-text access to more than 16 million references from over 2,500 high-quality journals and over 39,000 books and major reference works. Digital archive dates back to 1823.

#### [SpringerLink Journals](#)

A multidisciplinary database providing access to peer-reviewed journals, books, series, protocols, reference works and conference proceedings published by Springer.

#### [Taylor and Francis](#)

A multidisciplinary database providing full-text access to quality, peer-reviewed journals published by Taylor & Francis, Routledge and Psychology Press

### Wiley Online Library

A multi-disciplinary database providing access to over 4 million articles from 1,600 journals, online book chapters and eBooks published by Wiley.

## Academic Abstracting and Indexing Databases

### Compendex

An abstracting and indexing database covering all areas of engineering and applied science. Coverage includes transportation, optical technology, computers and data processing, electronics and communications, civil, mechanical, materials and automotive engineering as well as narrower subtopics within all these and other major engineering fields. The database indexes over 4,000 engineering journal titles and over 95,000 conference proceedings.

### Inspec

A leading abstracting and indexing database covering all areas of engineering and applied science. Coverage includes electrical engineering, electronics, physics, control engineering, information technology, communications and computing. The database indexes over 5,000 technical and scientific journal titles and over 70,000 conference proceedings

### Scopus

A multi-disciplinary abstract and citation database of peer-reviewed literature: journals, books and conference proceedings, many with links to full text.

### Web of Science

A powerful research platform and global citation index including over 161 million records for books, journals, and conference proceedings across 254 disciplines. Web of Science also includes comprehensive archives from 1900+ and citation data such as journal impact factors and h-index to help you identify quality research.

### Zetoc

Zetoc Search offers access to the contents pages of more than 39,500 current journals and 65.5 million article citations and conference papers dating back to 1993. The database is updated daily. Zetoc Alert is a current awareness service, which sends email alerts matching your search criteria whenever new records are added to the database.

You can check if LJMU has access to full-text by clicking on the **Full Text** icon within the database, this will check our other collections and direct you to any available full-text.

**Technical and professional databases** provide access to key technical and professional resources.

### British Standards Online

Provides access to British Standards and Eurocodes.

**Legal databases** provide access to cases, legislation, law reports, journals, guidance and newspapers.

### Lexis+ Library

Access to up-to-date legislation, case law, commentary and full-text and abstract of a wide range of legal journal articles. The News tab contains an archive of UK national and regional newspapers, with coverage from the 1990s up to the present day.

### Westlaw UK

Access to up-to-date legislation, case law, commentary and full-text and abstract of a wide range of legal journal articles.

**Statistics, social and business data databases** offer statistical evidence and reports including social and economic data.

### Fame

Provides financial reports and analysis of private and public limited companies in the UK and Republic of Ireland.

### IBIS World

A collection of industry reports organised by Standard Industry Classification (SIC) codes. It covers a broad array of industry sectors. The coverage includes global reports and country specific reports covering UK, Germany, US and Mexico. The reports provide analysis of each industry including industry performance, supply chain, key players, and competitive landscape.

### MINTEL

Market intelligence provides an outlook on the consumer landscape this includes data, market research, market analysis, competitive intelligence, and product intelligence: the expert analysts combine these elements to create insight of the market.

### Passport

Provides intelligence on industries, economies, consumers, and companies. Passport is a global market analysis platform that analyses the industry in countries around the world providing cross-country comparison of market sizes, forecasts and market shares.

### Statista

Provides access to statistics, studies and reports on countries, industries, and consumer markets. It has global coverage.

## UK Data Service

The UK's largest collection of social, economic and population data resource, including UK census data and government funded surveys as well as qualitative and business data.

## Websites

The content of websites is unregulated. Therefore, it is important that you check the quality and accuracy of information on the internet to ensure that it is reliable, accurate and of an academic standard. There are selected websites or search engines that you can use to help find appropriate information online, for example Google Scholar. If you find details for a relevant resource on the internet, you can check if LJMU has full-text access.

A selection of useful websites and search engines are shown below:

### arXiv.org

An open access repository of 1,588,176 e-prints and publications in the fields of physics, mathematics, computer science, quantitative biology, quantitative finance, statistics, electrical engineering and systems science, and economics. arXiv.org is available at:

<http://arxiv.org/>

### CiteSeerX

A search engine and evolving digital library of computer and information science literature.

CiteSeerX is available at: <https://citeseerx.ist.psu.edu/>

### Google Scholar

A large search engine which provides access to scholarly information and includes links to selected full-text from LJMU's resources. Access to LJMU's full-text content occurs automatically on campus; for off campus access you need to click Settings, Library Links and save Liverpool John Moores University as your institution. Google Scholar is available at: <http://scholar.google.co.uk/>

### RefSeek\*

An academic search engine which locates scholarly information. RefSeek\* is available at:

<http://www.refseek.com/>

## Further Help

The Academic Engagement Librarian for the School of Computer Science and Mathematics is:

Kelsey Johnston – [k.l.johnston@ljmu.ac.uk](mailto:k.l.johnston@ljmu.ac.uk)

Please contact her to arrange a one-to-one appointment.
