

**IT Services
Provision and Use
2018/19**

INTRODUCTION

This document lists general information relating to IT provision and use and is fully compliant with the requirements of the Freedom of Information Act (2000). The information provided was correct at the time of writing (September 2018) and will be reviewed annually.

Information on the total value of each contract is not routinely disclosed under the terms of Section 43 of the FOI Act, as to release such information would prejudice the University's commercial interests. The University considers that the release of information relating to future IT projects, business plans and IT Services strategic plans would constitute strategically useful information.

It should be noted that all contracts must adhere to the University's Financial Regulations. The University has produced a ['Guide on how to do business with Liverpool John Moores University'](#) which contains the relevant sections from the Financial Regulations and supporting University policies for companies wanting to supply LJMU with services/goods.
